## SCIENTIFIC LEGACY OF PETRO TOMCHUK. BIBLIOGRAPHY

*The bibliography contains a list of scientific works of the prominent Ukrainian theoretical physicist Petro Tomchuk (2.01.1934–7.10.2024). The bibliographic data are used to analyze the number of publications by year and identify the journals in which P.M. Tomchuk most often published his articles.*

*Keywords:* bibliography, theoretical physics, solid-state physics, semiconductors.

### A Brief Bibliography Note

Petro Tomchuk published more than 300 scientific works. His first article was published in 1960, and his last one in 2020. These two articles separate six decades of fruitful scientific activity conducted by P.M. Tomchuk.

The first edition of the list of scientific works by P.M. Tomchuk was published in 2014 in the collection “Life Credo Is Science: To the 80th Anniversary of Petro Mykhailovych Tomchuk” (ed. I. Gandzha, V. Shenderovskiy). Petro Tomchuk himself worked on compiling that list, together with the staff of the library at the Institute of Physics of the NAS of Ukraine. Here, we present a significantly supplemented and detailed bibliography, which also contains works by P.M. Tomchuk published after 2013. We tried to make this list of works as complete as possible. However, since not all of P.M. Tomchuk’s publications are available in electronic form (this mainly concerns works published in the Soviet era), it is still possible that we have missed some of them.

We deliberately did not add conference abstracts to the list, because, in any case, it is probably not possible to find all the abstracts of the talks that Petro Tomchuk made during his long scientific career

(he himself did not compile such a list). Therefore, we have kept in the bibliography only the materials of those conferences that were published in periodicals or in properly formatted collections of works. We have kept all the references to publications in the original language. Where possible, we have also added references to the translation of these publications into English.

The distribution of the number of publications by year (see Figure) allows us to conclude that the most fruitful period for Petro Tomchuk’s scientific activity was from 1985 to 1992. This golden period falls on the time when Petro Tomchuk was already 50 years old, but not yet sixty. A sharp decline in the number of publications in 1993–1994 can be explained by the crisis which developed in Ukraine immediately after the Soviet era. The period from 1999 to 2010 can be considered as a decade of renaissance for Petro Tomchuk’s scientific work, when he managed to rebuild himself conforming to a new lifestyle and published many important works. It is also worth highlighting the early surge in P.M. Tomchuk’s scientific activity, which was in the mid-70s (by that time, he was already 40 years old).

Among all the journals where P.M. Tomchuk published his works, the undisputed leader in terms of the number of publications is the Ukrainian Journal of Physics. As many as 76 articles by Petro Tomchuk were published here, including his last work. The second in terms of the number of publications is Physics of Solid State – a total of 30 articles, including the very first work by P.M. Tomchuk. More than ten works were also published in Physics and Technics

Citation: Gandzha I.S., Polevetska O.V., Barabash L.M., Gozhenko V.V., Shenderovskiy V.A. Scientific legacy of Petro Tomchuk. Bibliography. *Ukr. J. Phys.* **70**, No. 10, 738 (2025). <https://doi.org/10.15407/ujpe70.10.738>.

Distribution of the number of scientific works by P.M. Tomchuk by year. Undulating solid curve – exponential moving average (EMA) calculated by the formula  $y_{i+1} = y_i + \alpha(x_{i+1} - y_i)$ , where  $x_i$  is the value of the number series at the point  $i$ ,  $\alpha = 0.2$  is the smoothing constant. Smooth solid curve – fit by polynomials and hyperbolic function

of Semiconductors – 22 articles and Wiley’s *Physica Status Solidi (b)* – 15 articles. These four journals account for almost half of P.M. Tomchuk’s publications. The topics of these journals best characterize the main directions of P.M. Tomchuk’s scientific activity – general physical research, solid state physics, and semiconductor physics. It is worth noting that Petro Tomchuk also published more than 30 preprints at the Institute of Physics, where he worked throughout his entire scientific life. Given the number of articles published by P.M. Tomchuk in the Ukrainian Journal of Physics, it is natural that we publish a complete list of his scientific works here.

### List of Scientific Works by P.M. Tomchuk

#### 1960

1. I.M. Dykman, P.M. Tomchuk. Effect of electric field on the temperature of electrons, electrical conductivity, and thermoionic emission of semiconductors. I. Atomic semiconductors. Development of the method. *Phys. Solid State* **2**, No. 9, 2228–2239 (1960) [in Russian; English translation: *Sov. Phys.–Solid State* **2**, 1988–1998 (1961)].

#### 1961

2. P.M. Tomchuk. Effect of electric field on the temperature of electrons, electrical conductivity, and thermoionic emission of semiconductors. II. Accounting for plasma oscillations and close collisions. *Phys. Solid State* **3**, No. 4, 1019–1030 (1961) [in Russian].
3. I.M. Dykman, P.M. Tomchuk. Effect of electric field on the temperature of electrons, electrical conductivity, and

thermoionic emission of semiconductors. III. Thermoionic emission. *Phys. Solid State* **3**, No. 2, 632–641 (1961) [in Russian].

4. I.M. Dykman, P.M. Tomchuk. Effect of electric field on the temperature of electrons, electrical conductivity, and thermoionic emission of semiconductors. IV. Low lattice temperatures. *Phys. Solid State* **3**, No. 7, 1909–1919 (1961) [in Russian; English translation: *Sov. Phys.–Solid State* **3**, 1393–1399 (1962)].
5. P.M. Tomchuk. Variational method for determining electrical conductivity with allowance for the Coulomb interaction of carriers. *Phys. Solid State* **3**, No. 4, 1258–1267 (1961) [in Russian].

#### 1962

6. I.M. Dykman, P.M. Tomchuk. Effect of electric field on the temperature of electrons, electrical conductivity, and thermoionic emission of semiconductors. V. *Phys. Solid State* **4**, No. 5, 1082–1094 (1962) [in Russian, English translation: *Sov. Phys.–Solid State* **4**, 798 (1962)].
7. I.M. Dykman, P.M. Tomchuk. Electric conductivity of polar semiconductors with electron interactions taken into account. *Phys. Solid State* **4**, No. 12, 3551–3563 (1962) [in Russian, English translation: *Sov. Phys.–Solid State* **4**, 2600–2608 (1963)].

#### 1963

8. P.G. Borziak, O.G. Sarbey, P.M. Tomchuk. Physics of hot electrons. *Bull. Acad. Sci. USSR* **10**, 100–102 (1963) [in Russian].

#### 1964

9. I.M. Dykman, P.M. Tomchuk. Effect of majority carriers on the mobility of minority carriers in semiconductors. *Phys. Solid State* **6**, No. 5, 1388–1398 (1964) [in Russian; English translation: *Sov. Phys.–Solid State* **6**, 1085–1092 (1964)].
10. V.L. Vinetski, V.S. Mashkevich, P.M. Tomchuk. Theory of steady-state stimulated radiation for band-to-band transitions. *Phys. Solid State* **6**, No. 7, 2037–2046 (1964) [in Russian; English translation: *Sov. Phys.–Solid State* **6**, 1607 (1965)].

#### 1965

11. I.M. Dykman, P.M. Tomchuk. Conduction anisotropy of hot electrons and interelectron interactions. *Phys. Solid State* **7**, No. 1, 286–288 (1965) [in Russian; English translation: *Sov. Phys.–Solid State* **7**, 224–226 (1965)].
12. I.M. Dykman, P.M. Tomchuk. Anisotropic effect of electron-electron scattering on the conductivity of semiconductors with ellipsoidal equienergy surfaces. *Phys. Solid State* **7**, No. 8, 2298–2308 (1965) [in Russian; English translation: *Sov. Phys.–Solid State* **7**, 1861–1867 (1966)].
13. I.M. Dykman, N.N. Grigorev, P.M. Tomchuk. Temperature and mobility of hot electrons in polar semiconductors. *Phys. Solid State* **7**, No. 11, 3378–3385 (1965) [in

Russian; English translation: *Sov. Phys.–Solid State* **7**, 2719–2724 (1966)].

### 1966

14. P.M. Tomchuk, R.D. Fedorovich. Emission of hot electrons from thin metal films. *Phys. Solid State* **8**, No. 1, 276–278 (1966) [in Russian; English translation: *Sov. Phys.–Solid State* **8**, 226 (1966)].
15. I.M. Dykman, P.M. Tomchuk. Distribution function and mobility of electrons in polar semiconductors in the case of a nonparabolic dispersion law. *Phys. Solid State* **8**, No. 5, 1343–1350 (1966) [in Russian; English translation: *Sov. Phys.–Solid State* **8**, 1075–1080 (1966)].
16. V.M. Bondar, O.G. Sarbei, P.M. Tomchuk. Dependence of carrier scattering anisotropy in n-Ge on impurity concentration. *Phys. Solid State* **8**, No. 8, 2511–2513 (1966) [in Russian; English translation: *Sov. Phys.–Solid State* **8**, 2012–2013 (1967)].
17. P.M. Tomchuk, R.D. Fedorovich. Conductivity of thin metal films having an island structure. *Phys. Solid State* **8**, No. 10, 3131–3133 (1966) [in Russian; English translation: *Sov. Phys.–Solid State* **8**, 2510–2512 (1967)].
18. N.N. Grigorev, I.M. Dykman, P.M. Tomchuk. Emission of hot electrons from polar semiconductors with nonparabolic dispersion law. *Bull. Acad. Sci. USSR Phys. Ser.* **30**, No. 12, 1927–1929 (1966) [in Russian].

### 1967

19. N.N. Grigorev, I.M. Dykman, P.M. Tomchuk. Influence of an electric field on the magnetoresistance and on the Hall effect in polar semiconductors with a nonparabolic dispersion law. *Phys. Techn. Semicond.* **1**, No. 1, 132–135 (1967) [in Russian; English translation: *Sov. Phys.–Semiconductors* **1**, 101–103 (1967)].

### 1968

20. P.M. Tomchuk. Anisotropic scattering of current carriers in semiconductors. *Ukr. J. Phys.* **12**, No. 8, 1366–1377 (1968) [in Ukrainian].
21. I.M. Dykman, P.M. Tomchuk. Effect of electric field and energy dispersion law on plasma oscillations in semiconductors. *J. Exp. Theor. Phys.* **54**, No. 2, 592–602 (1968) [in Russian].
22. N.N. Grigorev, I.M. Dykman, P.M. Tomchuk. The distribution function and the temperature dependence of the mobility in A<sup>III</sup>B<sup>V</sup> semiconductors. *Phys. Solid State* **10**, No. 4, 1058–1064 (1968) [in Russian; English translation: *Sov. Phys.–Solid State* **10**, No. 4, 837–842 (1968)].

### 1969

23. I.M. Dykman, P.M. Tomchuk, L.A. Almasov. Propagation of electromagnetic waves in a plate-like semiconductor at nonstandard dispersion law of carrier energy. *Phys. Stat. Sol. B* **34**, No. 2, 805–813 (1969).
24. E.A. Pashitskii, P.M. Tomchuk. Superconductivity in quantizing superconducting films with a granulated

metallic coating. *J. Exp. Theor. Phys. Lett.* **9**, No. 6, 367–371 (1969) [in Russian; English translation: *JETP Lett.* **9**, No. 6, 218–220 (1969)].

25. I.M. Dykman, P.M. Tomchuk. Effect of electric field and energy dispersion law on the propagation of electromagnetic waves in semiconductors. *Phys. Techn. Semicond.* **3**, No. 9, 1281–1288 (1969) [in Russian].

### 1970

26. P.M. Tomchuk, V.A. Shenderovskiy. Fluctuations in non-equilibrium semiconductor plasma. I. Low-resistance semiconductors. *Ukr. J. Phys.* **14**, No. 4, 630–638 (1970) [in Ukrainian].
27. P.M. Tomchuk, V.A. Shenderovskiy. Current fluctuations in polar semiconductors in a strong electric field in the case of non-parabolic dispersion law. II. High-resistance semiconductors. *Ukr. J. Phys.* **15**, No. 6, 901–906 (1970) [in Ukrainian].

### 1971

28. I.M. Dykman, P.M. Tomchuk. Non-equilibrium plasma in semiconductors with anisotropic band structure. *Phys. Stat. Sol. B* **48**, No. 2, 547–561 (1971).
29. V.M. Pavlenko, P.M. Tomchuk. On the echo effect in a relativistic plasma. *Ukr. J. Phys.* **16**, No. 5, 784–789 (1971) [in Ukrainian].
30. V.M. Pavlenko, P.M. Tomchuk, O.O. Chumak. Effect of a quantizing magnetic field on the propagation of electromagnetic waves in multivalley semiconductors. *Ukr. J. Phys.* **16**, No. 12, 2060–2063 (1971) [in Ukrainian].
31. V.N. Pavlenko, P.M. Tomchuk. Plasma echo in semiconductors. *Prepr. Inst. Phys.* **5** (1971) [in Russian].
32. P.M. Tomchuk, A.A. Chumak. Fluctuations in nonequilibrium electron-phonon systems. *Prepr. Inst. Phys.* **9** (1971) [in Russian].
33. P.M. Tomchuk, V.A. Shenderovskii. Scattering and transformation of waves on fluctuations in a nonequilibrium semiconductor plasma. *Prepr. Inst. Phys.* **12** (1971) [in Russian].
34. V.N. Pavlenko, P.M. Tomchuk, A.A. Chumak. Resonant damping of magnetoplasma excitations in multivalley semiconductors. *Prepr. Inst. Phys.* **13** (1971) [in Russian].

### 1972

35. V.M. Pavlenko, P.M. Tomchuk. Plasma echo in semiconductors. *Ukr. J. Phys.* **17**, No. 6, 875–880 (1972) [in Ukrainian].
36. I.M. Dykman, P.M. Tomchuk. Electromagnetic waves in semiconductors. *Bull. Acad. Sci. Ukr. SSR* **10**, 32–40 (1972) [in Ukrainian].
37. P.M. Tomchuk, V.A. Shenderovskii. Scattering and transformation of waves by fluctuations in a nonequilibrium plasma in a semiconductor with an anisotropic energy band. *J. Exp. Theor. Phys.* **62**, No. 3, 1131–1143 (1972) [in Russian; English translation: *JETP* **35**, No. 3, 598–604 (1972)].

38. P.M. Tomchuk, A.A. Chumak. Fluctuations in multivalley semiconductors associated with intervalley transitions. *Phys. Solid State* **14**, No. 8, 2347–2351 (1972) [in Russian].
39. V.N. Oraevskii, V.P. Pavlenko, P.M. Tomchuk. Nonlinear interaction between waves in a nonequilibrium semiconductor plasma. *Phys. Techn. Semicond.* **6**, No. 9, 1647–1654 (1972) [in Russian; English translation: *Sov. Phys.–Semiconductors* **6**, No. 9, 1425–1430 (1972)].

## 1973

40. P.M. Tomchuk, O.O. Chumak. High-frequency fluctuations in nonequilibrium electron-phonon systems. *Ukr. J. Phys.* **18**, No. 10, 1620–1630 (1973) [in Ukrainian].
41. P.M. Tomchuk, O.O. Chumak. Fluctuations in electron-phonon systems in the presence of strong electric and magnetic fields. *Ukr. J. Phys.* **18**, No. 11, 1818–1827 (1973) [in Ukrainian].
42. P.M. Tomchuk, A.A. Chumak. Quantum kinetic equation for fluctuations in nonequilibrium electron-phonon systems. *Phys. Solid State* **15**, No. 4, 1011–1018 (1973) [in Russian].
43. P.M. Tomchuk, I.I. Ivanov. Electron-phonon interaction in field emission. *Phys. Solid State* **15**, No. 5, 1617–1620 (1973) [in Russian].
44. P.G. Borziak, V.M. Kolomiets, Yu.A. Kulyupin, E.A. Pashitskii, K.N. Pilipchak, P.M. Tomchuk, I.I. Pinchuk. On the nature of the luminescence of dispersed metal films. 1. Characteristics of the luminescence of dispersed metal films. *Prepr. Inst. Phys.* **1** (1973) [in Russian].

## 1974

45. P.M. Tomchuk, V.A. Shenderovskii. Wave scattering processes on fluctuations in non-equilibrium semiconductor plasma with isotropic non-parabolic dispersion law of carrier energy. *Phys. Stat. Sol. B* **63**, No. 2, 709–718 (1974).
46. N.N. Grigorev, I.M. Dykman, P.M. Tomchuk. Influence of the electron-electron interaction on the appearance of a negative transverse conductivity in n-type Ge. *Phys. Techn. Semicond.* **8**, No. 6, 1083–1089 (1974) [in Russian; English translation: *Sov. Phys.–Semiconductors* **8**, No. 6, 706–710 (1974)].
47. P.M. Tomchuk, I.I. Pinchuk. Variational method in the theory of kinetic coefficients. *Prepr. Inst. Phys.* **19** (1974) [in Russian].

## 1975

48. P.M. Tomchuk, V.A. Shenderovskii, P.N. Gorley, N.P. Gavaleshko, L.S. Solonchuk. Galvanomagnetic properties of anisotropic semiconductors of the p-Te type. *Phys. Stat. Sol. B* **71**, 41–50 (1975).
49. P. Borziak, Yu. Kulyupin, P. Tomchuk. Electron processes in discontinuous metal films. *Thin Solid Films* **30**, No. 1, 47–53 (1975).
50. P.M. Gorley, P.M. Tomchuk, V.A. Shenderovskii. Theory of electrical conductivity of anisotropic semiconductors of

the p-Te type. *Ukr. J. Phys.* **20**, No. 5, 705–716 (1975) [in Ukrainian].

51. S.S. Rozhkov, P.M. Tomchuk, O.O. Chumak. Hot electrons of multivalley semiconductors in quantizing magnetic fields. *Ukr. J. Phys.* **20**, No. 9, 1409–1416 (1975) [in Ukrainian].
52. P.M. Tomchuk, O.O. Chumak. Nonequilibrium fluctuations in a gas with pair collisions. *Rep. Acad. Sci. Ukr. SSR Ser. Phys. Math.* **10**, 930–936 (1975) [in Ukrainian].
53. P.G. Borziak, P.M. Tomchuk, Yu.O. Kulyupin. Electronic processes in dispersed metal films. *Bull. Acad. Sci. Ukr. SSR* **5**, 5–15 (1975) [in Ukrainian].
54. P.M. Tomchuk, A.A. Chumak. Effect of the electron-electron interaction on the nonequilibrium noise in many-valley semiconductors. *Phys. Solid State* **17**, No. 4, 1188–1190 (1975) [in Russian; English translation: *Sov. Phys.–Solid State* **17**, No. 4, 764–765 (1975)].
55. I.I. Pinchuk, P.M. Tomchuk. Influence of electron-electron scattering on the Hall effect in n-type Ge and n-type Si. *Phys. Techn. Semicond.* **9**, No. 4, 801–803 (1975) [in Russian; English translation: *Sov. Phys.–Semiconductors* **9**, No. 4, 528–529 (1975)].
56. P.M. Tomchuk, A.A. Chumak. Effect of interelectronic interaction on nonequilibrium noise in multivalley semiconductors. *Phys. Techn. Semicond.* **9**, No. 9, 1668–1673 (1975) [in Russian].
57. P.M. Tomchuk, V.A. Shenderovskii, P.N. Gorley. Galvanomagnetic phenomena in anisotropic p-Te semiconductors. A. The case of strong magnetic fields. *Prepr. Inst. Phys.* **14** (1975) [in Russian].
58. P.M. Tomchuk, V.A. Shenderovskii, P.N. Gorley, N.P. Gavaleshko, L.S. Solonchuk. Theory of galvanomagnetic properties of anisotropic p-Te semiconductors. *Prepr. Inst. Phys.* (1975) [in Russian].
59. P.M. Tomchuk, I.I. Pinchuk. Application of the variational method in the theory of electron-phonon drag in semiconductors and metals. *Prepr. Inst. Phys.* (1975) [in Russian].

## 1976

60. I.M. Dykman, P.M. Tomchuk. Transport phenomena and eigenoscillations of hot electrons in semiconductors with periodic structure. *Phys. Stat. Sol. B* **76**, No. 1, 385–393 (1976).
61. P.M. Tomchuk, V.A. Shenderovskii. Distribution function and mobility of hot carriers in lead chalcogenides. *Ukr. J. Phys.* **21**, No. 1, 18–27 (1976) [in Ukrainian].
62. P.G. Borziak, I.I. Zapesochnyi, I.A. Kononov, V.A. Kritskii, Yu.A. Kulyupin, K.N. Pilipchak, S.S. Pop, P.M. Tomchuk. Optical emissions from films and polycrystals of noble metals bombarded with slow electrons. *Bull. Acad. Sci. USSR Phys. Ser.* **40**, No. 8, 1621–1626 (1976) [in Russian].
63. P.G. Borziak, Yu.A. Kulyupin, S.A. Nepijko, P.M. Tomchuk. Effect of electron heating on the processes in island films. *Bull. Acad. Sci. USSR Phys. Ser.* **40**, No. 12, 2609–

- 2615 (1976) [in Russian; English translation: *Bull. Acad. Sci. USSR Phys. Ser.* **40**, 139–145 (1976)].
64. P.M. Tomchuk, A.A. Chumak, A.I. Shchedrin. Effect of a magnetic field on ambipolar drift noise in semiconductors. *Phys. Techn. Semicond.* **10**, No. 4, 716–719 (1976) [in Russian; English translation: *Sov. Phys.–Semiconductors* **10**, No. 4, 425–427 (1976)].
65. A.A. Tarasenko, P.M. Tomchuk, A.A. Chumak. Fluctuations in anisotropic semiconductors associated with carrier drift. *Phys. Techn. Semicond.* **10**, No. 8, 1520–1523 (1976) [in Russian].
66. I.M. Dykman, P.M. Tomchuk. Eigenoscillations of non-equilibrium plasma in spatially periodic semiconductors. *Phys. Techn. Semicond.* **10**, No. 8, 1551–1554 (1976) [in Russian].
67. I.I. Pinchuk, P.M. Tomchuk. Kinetic coefficients in metals and semimetals. *Prepr. Inst. Phys.* **8** (1976) [in Russian].

### 1977

68. B.I. Lev, P.M. Tomchuk. Eddy currents in liquid crystals. *Ukr. J. Phys.* **22**, No. 3, 421–425 (1977) [in Ukrainian].
69. S.S. Rozhkov, P.M. Tomchuk. Current fluctuations in semiconductors in the presence of a quantizing electric field. *J. Exp. Theor. Phys.* **72**, No. 1, 248–256 (1977) [in Russian; English translation: *JETP* **45**, No. 1, 130–134 (1977)].
70. B.I. Lev, P.M. Tomchuk. On the relation between phenomenological and microscopic approaches in the theory of liquid crystals. *Theor. Math. Phys.* **32**, No. 1, 101–113 (1977) [in Russian].
71. P.M. Tomchuk. Physical concept of hot electrons in semiconductors; some examples of distribution functions and formulas for the density of emission current of hot electrons. *Cold Cathodes*, ed. M.I. Elinson, p. 47–57 (Sov. Radio, 1977) [in Russian].
72. S.L. Korolyuk, I.I. Pinchuk, P.M. Tomchuk. Longitudinal kinetic phenomena in quantizing magnetic fields. *Prepr. Inst. Phys.* **11** (1977) [in Russian].

### 1978

73. I.M. Dykman, P.M. Tomchuk. Electromagnetic waves in inhomogeneous semiconductors with non-equilibrium carriers. *Phys. Stat. Sol. B* **86**, No. 2, 733–780 (1983).
74. A.A. Tarasenko, P.M. Tomchuk, A.A. Chumak. Instability of the adatom lattice and fluctuations of the field emission current. *Phys. Solid State* **20**, No. 4, 1213–1217 (1978) [in Russian].
75. I.M. Dykman, P.M. Tomchuk. Effect of a heating field on the reflection of electromagnetic waves from the surface of spatially inhomogeneous semiconductors. *Phys. Techn. Semicond.* **12**, No. 9, 592–594 (1978) [in Russian].
76. I.I. Pinchuk, P.M. Tomchuk. Longitudinal isothermal Nernst-Ettingshausen effect in a quantizing magnetic field ( $H \perp \nabla T$ ). *Phys. Techn. Semicond.* **12**, No. 9, 1698–1703 (1978) [in Russian; English translation: Longitudinal

isothermal Nernst-Ettingshausen effect in a quantizing magnetic field (magnetic field directed at right angles to a temperature gradient). *Sov. Phys.–Semiconductors* **12**, No. 9, 1005–1008 (1978)].

77. A.A. Tarasenko, P.M. Tomchuk, A.A. Chumak. Voltage fluctuations in anisotropic semiconductors associated with carrier drift. *Phys. Techn. Semicond.* **12**, No. 9, 1777–1781 (1978) [in Russian].
78. P.M. Tomchuk. Light emission in dispersed metal films under the action of current. *Prepr. Inst. Phys.* **1** (1978) [in Russian].

## 2012

283. P.M. Tomchuk, D.V. Butenko. The nanoparticle shape's effect on the light scattering cross-section. *Surf. Sci.* **606**, 1892–1898 (2012).
284. V.M. Bondar, P.M. Tomchuk, G.A. Shepelskii. Effect of weak magnetic field on terahertz radiation of hot electrons in n-Ge. *Phys. Stat. Sol. B* **10**, No. 2, 344–351 (2012).
285. V.V. Kulich, P.M. Tomchuk. One-electron optical properties of a nanorice with a nonconcentric core. *Part. Part. Syst. Character.* **29**, No. 4, 238–252 (2012).
286. P.M. Tomchuk. Dependence of light scattering cross-section by metal nanoparticles on their shape. *Ukr. J. Phys.* **57**, No. 5, 552–559 (2012).

**2013**

287. V.M. Bondar, P.M. Tomchuk, G.A. Shepelskii. Effect of weak magnetic field on terahertz radiation of hot electrons in n-Ge. *Phys. Stat. Sol. B* **250**, No. 2, 344–351 (2013).
288. P.M. Tomchuk, V.M. Bondar, L.S. Solonchuk. Dependences of terahertz radiation emitted by hot charge carriers in p-Te. *Ukr. J. Phys.* **58**, No. 2, 135–141 (2013) [arXiv:1302.7182].
289. P.M. Tomchuk, M.S. Brodyn, V.I. Volkov, V.R. Lyakhovetskii. Third-order optical nonlinearity of noble metal nanostructures. *Ukr. J. Phys. Rev.* **8**, No. 1, 50–69 (2013) [in Ukrainian].

**2014**

290. P. Tomchuk, Y. Bilotsky. New peculiarity in the temperature and size dependence of electron-lattice energy exchange in metal nanoparticles. *Int. J. Mod. Phys. B* **28**, No. 31, 1450220 (2014) [arXiv:1403.5312].
291. V.V. Cherepanov, R.D. Fedorovich, O.E. Kiyayev, A.G. Naumovets, V.B. Nechyaylo, P.M. Tomchuk, L.V. Viduta. One-dimensional array of point-like light sources based on gold nanoparticles and tetracene: Preparation and possible operation mechanisms. *Appl. Phys. Lett.* **105**, No. 19, 193302 (2014).
292. P.M. Tomchuk, V.M. Bondar, O.E. Levshin. Influence of anisotropic scattering mechanisms on polarization dependences of terahertz radiation emitted by hot electrons. *Ukr. J. Phys.* **59**, No. 5, 505–514 (2014).
293. P.M. Tomchuk, Y. Bilotsky. Electron-lattice energy exchange in metal nanoparticles. Quantum-kinetic and classical approaches. Preprint arXiv:1401.2243 (2014).

**2015**

294. V.N. Starkov, M.S. Brodyn, P.M. Tomchuk, V.Ya. Gayvoronsky, A.Yu. Boyarchuk. Mathematical interpretation of experimental research results on nonlinear optical material properties. *Ukr. J. Phys.* **60**, No. 7, 601–613 (2015).
295. P.M. Tomchuk, D.V. Butenko. Dependences of dipole plasmon resonance damping constants on the shape of metallic nanoparticles. *Ukr. J. Phys.* **60**, No. 10, 1042–1049 (2015).

**2016**

296. P.M. Tomchuk, D. Butenko. Single and double ultrashort laser pulse scattering by spheroidal metallic nanoparticles. *J. Nanophotonics* **10**, No. 1, 016018 (2016) [arXiv:1412.0712].
297. V.M. Bondar, P.M. Tomchuk. Polarization dependences of radiation emission by hot carriers in InSb. *Ukr. J. Phys.* **61**, No. 2, 150–154 (2016).
298. D.V. Butenko, P.M. Tomchuk. Influence of the magnetic dipole moment of a metal nanoellipsoid on the scattering of electromagnetic waves. *Ukr. J. Phys.* **61**, No. 3, 255–264 (2016).

**2017**

299. P.M. Tomchuk, D. Butenko. Nonlocal effects in metallic nanoparticles: the kinetic approach outlook. *Int. J. Mod. Phys. B* **31**, No. 5, 1750029 (2017) [arXiv:1604.07154].

300. V.N. Starkov, A.A. Borshch, I.S. Gandzha, P.M. Tomchuk. Some examples of seemingly plausible interpretation of experimental results. *Ukr. J. Phys.* **62**, No. 6, 481–488 (2017).
301. P.M. Tomchuk, V.N. Starkov, D.V. Butenko. Integral equations in the general theory of light absorption and scattering. *Ukr. J. Phys.* **62**, No. 8, 705–716 (2017).

**2018**

302. I.P. Fesenko, L.B. Viduta, V.I. Chasnyk, V.B. Nechytailo, D.V. Butenko, V.M. Tkach, V.Z. Turkevich, O.A. Marchenko, I.I. Zelenska, O.M. Kaidash, T.B. Serbenyuk, T.M. Belyaeva, E.F. Kuz'menko, P.M. Tomchuk. Structure and current-voltage characteristics of islet gold films on high-heat conducting pressureless sintered AlN ceramics. *J. Superhard Mater.* **40**, 432–434 (2018).
303. P.M. Tomchuk, V.N. Starkov. Influence of shape spread in an ensemble of metal nanoparticles on their optical properties. *Ukr. J. Phys.* **63**, No. 3, 204–214 (2018).
304. P.M. Tomchuk, V.N. Starkov. Magnetic absorption of metal nanoparticles. *Ukr. J. Phys.* **63**, No. 10, 906–911 (2018).

**2019**

305. P.M. Tomchuk, V.N. Starkov. Averaged optical characteristics of an ensemble of metal nanoparticles. *Int. J. Mod. Phys. B* **33**, No. 18, 1950188 (2019) [arXiv:1901.04793].
306. V.N. Starkov, P.M. Tomchuk. Problems, methods, and algorithms in models of physical fundamentals of elements of optical computers. *Cybern. Syst. Anal.* **55**, 153–166 (2019).
307. V.N. Starkov, P.M. Tomchuk. On the effect of measurement errors on the interpretation of results of laser experiments. *Collect. Sci. Works on Mathematical and Computer Simulation, Ser. Phys. Math. Sci.*, p. 155–160 (2019) [in Ukrainian].

**2020**

308. P.M. Tomchuk, V.N. Starkov. Electron-lattice energy exchange and hot electrons in metal island films. *Ukr. J. Phys.* **65**, No. 11, 979–986 (2020).

НАУКОВИЙ СПАДОК ПЕТРА ТОМЧУКА.  
БІБЛІОГРАФІЧНИЙ ОПИС

Бібліографічний опис містить список наукових праць видатного українського фізика-теоретика Петра Михайловича Томчука (2.01.1934–7.10.2024). Бібліографічні дані використано для аналізу кількості публікацій за роками і визначено журнали, в яких Петро Томчук найчастіше публікував свої статті.

*Ключові слова:* бібліографія, теоретична фізика, фізика твердого тіла, напівпровідники.
